Submitted To: Sir Jawad Safder

Program: Data Science (F-23)

Semester: 6th

Here is a step-by-step breakdown of all the visualizations in the Tableau Dashboard

1. KPIs

To make this visualization I created five calculated fields. These fields are Employee Count, Attrition Count, Attrition Rate, Active Employees and Average Age. Each KPI is shown using a Text Mark on sheets and then combined in the HR Analytics Dashboard.

For the design I used bold labels for titles. I also used white bold font for values. The background is navy blue for a look.

These KPIs give a summary for management. The HR Analytics Dashboard shows the following information:

- Employee Count is 1,470
- Attrition Count is 237
- Attrition Rate is 16.12%
- Active Employees are 1,233
- Average Age is 37

These indicators help management understand the workforce size, turnover and demographics of the HR Analytics Dashboard.

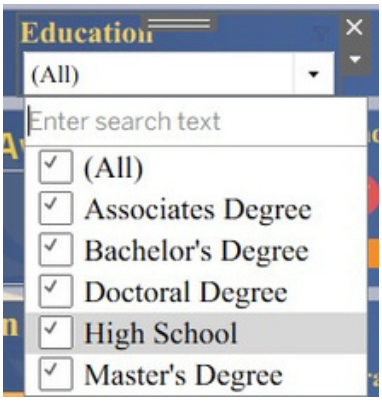
Active employees	Attritution Rate	Attritution count	Employee Count	Avg. Age
1,233	16.12%	237	1,470	37

2. Education Filter

- To create this filter I did the following steps:
- Drag Education to the Filters shelf
- Right-click. Then Show Filter
- Change style to Multiple Values Dropdown
- Apply it to all worksheets using Apply to Worksheets and then All Using This Data Source

This interactive filter allows users to analyze data based on education levels such as Associate's Degree, bachelor's degree, Master's Degree, Doctoral Degree and High School.

It helps in comparing attrition trends across education backgrounds in the HR Analytics Dashboard.



3. Department Wise Attrition

To create this chart I did the following steps:

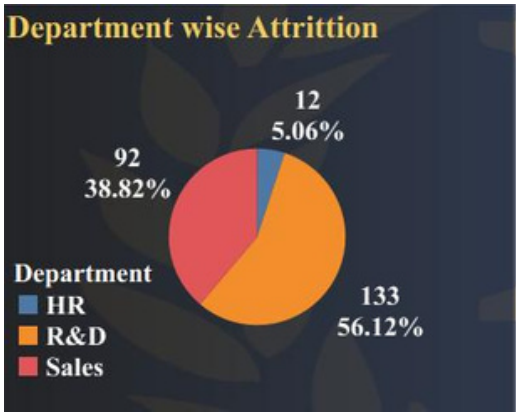
- Drag Department to Color
- Drag Attrition Count to Angle
- Change mark type to Pie
- Add Department and Attrition Count to Label

This chart shows the following information:

- R&D has 56.12%, which is the highest attrition with 133 employees.

- Sales have 38.82% with 92 employees
- HR has 5.06%, which is the lowest attrition with 12 employees

The HR Analytics Dashboard helps identify which department needs more attention.



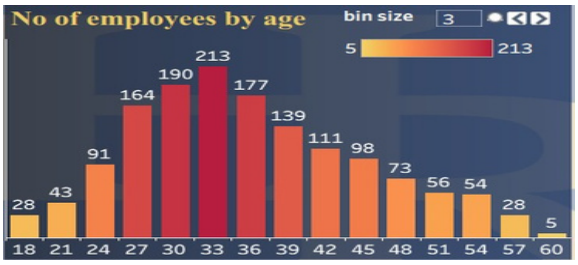
4. Number of Employees by Age

To create this visualization, I took the following steps:

- Drag Age to Columns
- Drag Number of Records to Rows
- Create Bins with size 3
- Use Bar Chart
- Apply Red-Orange color gradient

The HR Analytics Dashboard provides the following insights:

Most employees are between 30–36 years. The peak is at age 33 with 213 employees. The workforce decreases after age 48. This shows the workforce age distribution in the HR Analytics Dashboard.



5. Job Satisfaction Rating

To create this, I did the following steps:

- Drag Job Role to Rows

- Drag Job Satisfaction to Columns
- Drag Employee Count to Text and Color
- Change mark type to Square
- Apply Orange gradient color
- Add Grand Totals

The HR Analytics Dashboard provides the following insights:

Sales Executives have the highest total employees with 326. Research Scientists show satisfaction at level 4 with 95 employees. This helps identify satisfaction levels across job roles in the HR Analytics Dashboard.

Job Satisfaction rate

Job Role	1	2	3	4	Grand..
Healthcare R..	26	19	43	43	131
Human Reso..	10	16	13	13	52
Laboratory T..	56	48	75	80	259
Manager	21	21	27	33	102
Manufacturi..	26	32	49	38	145
Research Dir..	15	16	27	22	80
Research Sci..	54	53	90	95	292
Sales Executi..	69	54	91	112	326
Sales Represe..	12	21	27	23	83
Grand Total	289	280	442	459	1,470

6. Attrition by Gender

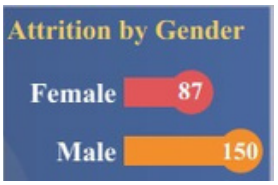
To create this, I did the following steps:

- Drag Gender to Rows
- Drag Attrition Count to Columns
- Change mark type to Bar
- Drag Gender to Color
- Add Attrition Count to Label

The HR Analytics Dashboard provides the following insights:

- Male attrition is 150
- Female attrition is 87

This shows that male employees have higher attrition compared to females in the HR Analytics Dashboard.



7. Attrition Rate by Gender for Age Groups

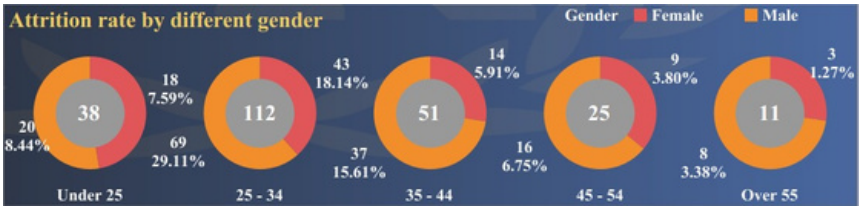
To create this, I took the following steps:

- Create Age Groups such as Under 25, 25–34, 35–44 45–54 and Over 55
- Build dual-axis pie charts
- Convert into donut charts by adding a white inner circle
- Use Gender to Color
- Add Attrition Count and percentage to Label

The HR Analytics Dashboard provides the following insights:

- Age group 25–34 has the highest attrition with 112
- Males have higher attrition in most age groups
- Over 55 has the lowest attrition

This helps us understand age and gender patterns together in the HR Analytics Dashboard.



8. Education Field Wise Attrition

To create this, I did the following steps:

- Drag Education Field to Rows
- Drag Attrition Count to Columns
- Sort in descending order
- Apply orange color
- Add labels

The HR Analytics Dashboard provides the following insights:

- Life Sciences has 89 which's the highest attrition

- Medical has 63
- Marketing is 35
- Human Resources has 7 which is the lowest attrition

This shows which educational backgrounds have employee turnover in the HR Analytics Dashboard.
